Proposed Project: Pregnancy Prevention Approaches Evaluation Baseline Data Collection- OMB
No. OS-0990-NEW- The Office of Adolescent Health (OAH)

Abstract: The Office of Adolescent Health (OAH), Office of the Assistant Secretary for Health (OASH), U.S. Department of Health and Human Services (HHS), is overseeing and coordinating adolescent pregnancy prevention evaluation efforts as part of the Teen Pregnancy Prevention Initiative. OAH is working collaboratively with the Office of the Assistant Secretary for Planning and Evaluation (ASPE), the Centers for Disease Control and Prevention (CDC), and the Administration for Children and Families (ACF) on adolescent pregnancy prevention evaluation activities.

The Evaluation of Adolescent Pregnancy Prevention Approaches (PPA) is one of these efforts. PPA is a random assignment evaluation which will expand available evidence on effective ways to reduce teen pregnancy. The evaluation will document and test a range of pregnancy prevention approaches in up to eight program sites. The findings from the evaluation will be of interest to the general public, to policy-makers, and to organizations interested in teen pregnancy prevention.

OAH proposed baseline data collection activity as part of the PPA evaluation. A core baseline data collection instrument was approved on July 26, 2010. The project has worked in recent months to secure grantees as evaluation sites, and as part of this effort the project has undertaken making revisions to the baseline instrument with each site. These revisions were undertaken because each site has unique features (e.g. target population; curriculum; objectives) and the baseline instruments were tailored to take these features into account. Emergency clearance of

the site-specific baseline package was approved August 17, 2011 (ICR Reference No: 201107-0970-003). OAH is now requesting full clearance to collect data using site-specific instruments with a 3-year expiration date.
